

REMARKS

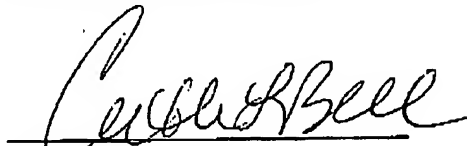

Claims 1- 19 are pending and have been subjected to a species election requirement stating that "a multiplicity of compositions comprising multiplicities of free radical initiators, precursors and monomers" are patentably distinct species of the claimed invention. Applicant respectfully disagrees. However to further prosecution Applicant elects the species of styrene for the monomer, peroxide for the free radical initiator and catalyst (9) in the examples as the precursor. This species election reads upon claims 1 to 19. If the Examiner needs more definition of the species election, he is encouraged to call Applicant's Attorney at 281-834-5982.

Applicant respectfully submits that the claims are in condition for allowance and respectfully requests notice of such.

Please charge all charges with respect to this Amendment or otherwise, to Deposit Account No. 05-1712 maintained by the Assignee.

Respectfully submitted,

Date: Nov 4, 2005
